10011225 - FTTP MDU Level 4 Wall Box - Large

Product Overview

The closure is equipped with a Patch panel that can be equipped up to 48 end user connections. The Splicing capacity of the wallbox enables up to 96 Splices on both the Network side and Access Side. The trays are arranged in a 6 + 6 configuration, 6 x Network and 6 x Access.
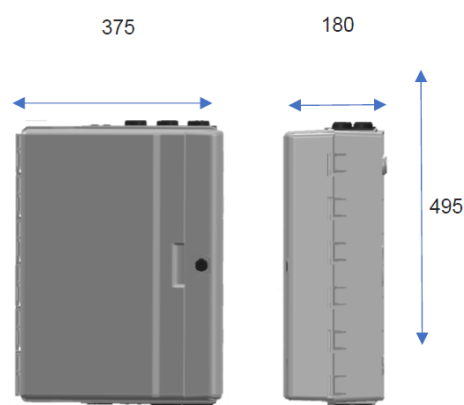

Each tray has the capacity of 16 x single splice sleeves. The Enclosure is equipped with a lockable front door and a hinged mounting plate, maximizing cabling efficiency. Modular cable entrances of 'slide in' type are mounted at the top and bottom of the closure. This allows for quick and easy installation of virtually any type of cable or microduct
