

EXFO

EXFO MaxTester 945

Fiber certifier OLTS

Features

- 7-inch high resolution touchscreen—the widest screen on the market
- Leading FasTesT™ performances: certifies two fibers at two wavelengths under three seconds
- Onboard assistant and diagnosis to eliminate reference errors and negative loss
- Built-in Encircled-Flux compliancy as per ANSI/TIA and ISO/IEC
- 100% automated fiber inspection: one-step process with pass/fail analysis at both ends of the fiber
- Certifies against multiple industry standards at once

Application

- Data Centers
- Enterprise structured cabling

Product Information

EXFO MAX-940/945 replaces the extremely popular predecessor FOT-930/935. The interfaces have been thoroughly modernized with the MaxTester chassis.

Of course, the new MAX-940/945 are compatible with their predecessors and can be paired with them.

MAX-940 measures fiber length and dB bidirectionally on one and the same fiber with two or three wavelengths.

MAX-945 also measures the ORL of the fiber link and thus provides a health indication on the route's contacts.

The instruments can also be purchased as a certification tool and are then called "iCert".

Technical Information

Product Color	Blue
Temperature, Operation [°C]	-10 / +50°C
Temperature, Storage [°C]	-30 / +70°C
