

Capping Steel No.1

Designed for protecting cables not exceeding 19mm on wooden poles

Features

- Accommodates cables diameters of up to 19mm
- 2440mm x 76mm
- Pre-drilled ready for fixing
- Galvanised steel finish
- Providing secure cable management and weather resistance

Application

Capping, External Overhead, Pole Furniture, Telegraph Pole

Design

Steel Capping No.1 is designed for installation onto wooden poles, ensuring the protection of cables from both the weathering and unauthorized tampering. This capping, constructed from galvanized steel, is pre-drilled for easy attachment to wooden poles. It provides a cable trunking space accommodating diameters of up to 19mm, providing secure cable management and weather resistance.
