Slim Customer Point of Entry Box

Optimized alternative solution for a quick, simple splice box for up to 2 customer drop connections,

Features

- Discreet solution
- Flush mounting to ceiling
- Security sealable (Optional extra)
- Holds 2 drop customers (LC connectors)
- Holds 1 drop customer (SC connector)
- Great easy fibre management.
- Can hold 3m of discreet cable mid-sheath.
- Cable entry/ drop exit points at both sides.

Application

The Hexatronic Discreet Customer Point of Entry Box Slim version is ideal for installations in MDU units where there is no access to a false ceiling and cables need to be surface run.

Design

The Hexatronic Customer Point of Entry Box - Slim version is an optimized alternative solution for a quick, simple splice box for up to 2 customer drop connections, holding either a LC duplex or SC simplex connector where a pigtail can be spliced.

Again, this customer box is designed to be installed within walls, ceilings, or floors, providing a clean and discreet appearance while also protecting the fibre optic cabling from damage. It features a compact, modular design that can accommodate various fibre optic cables, making it suitable for a wide range of applications.

This is used in conjunction with Hexatronic Discreet Cabling and fixing solutions and can be custom configured to suit your network build; for example, with a range of adaptors and pigtails pre-installed. Custom branding is available upon request.

Product Information

The Hexatronic Discreet Customer Point of Entry Box Slim version is 150mm long x 45mm wide x 18mm deep
Custom branding is available upon request
