

# Slim Dome Accessories

A range of accessories available for the Hexatronic Slim Dome Closures.

---

## Features

- Accessories to suit your solution requirements
- Splice cassette 12F, Wall mounting bracket, Splitter holder, Adaptor holders, Aerial strand mounting bracket

## Design

The smaller size domes are denoted by "SHDC," which stands for "Slim Hexatronic Dome Closure." These closures are available in two sizes, SHDC-AA and SHDC-AB, with splice capacities of 144f (288f) and 288f (576f) respectively. These smaller dome closures are ideal for applications where space is limited, but high splice capacity is still required.
