

# Mechanical Port Seals

**Our cable entry ports could not be simpler with our toolless design**

---

## Features

- Peelable cable entry ports
- All cable entry ports are the same size but various glands available for different requirements
- SHDC accepts up to 3 ports
- LHDC accepts up to 5 ports

## Design

Adding cable entry ports could not be simpler with Hexatronic's toolless design. No special tools are required - simply peel out the seal and clean up any sharp edges with the emery paper supplied in the seal kit. It's quick, easy, and hassle-free, ensuring a smooth and efficient installation process.

All cable entry ports are the same size but various glands can be installed for different cable diameters and solutions.

Seals for tubes are push through, no plug required unless the port has been opened.

The base of our SHDC will accept up to 3 port sealing kits and the base of our LHDC will accept up to 5.
