

72f Inline Midspan Closure

IP68 72 fibre/splice capacity

Features

- 72 fibre max splice capacity
- 8 ports and various grommets for multiple cabling solution
- Midspan storage capability
- Compact, lightweight and robust design
- Can be installed directly in manholes
- Can be mounted on telegraph poles
- IP68 Rating

Application

The HCR inline fibre closure is typically used as a branch out splicing point in a fibre access network. Fibres from a distribution cable can be dropped off and spliced onto drop cables or splitters for end-user connections. The closure can also be used as a straight joint for traditional cables or micro cables

Design

The closure consists of a durable black polymer outer shell with eight ports supporting various cable entries, including midspan entry. Internally it is equipped with up to 3 x 24 fibre splice cassettes. The design allows for easy splicing and re-entry and maintains a 30mm minimum bend radius throughout.

Product Information

Splice capacity 36 (72).
Cable diameter Ø3 ~ Ø16
4 Feed / Branch Cables
16 Drop Cables

Technical Information

Product Color	Black
IP Rating	IP68
