

19" Patch and Splice Panel

High-Quality Splice and Patch in 19" footprint

Features

- Up to 96 LC Fibre connections
- Sliding drawer allows internal access
- Without removing panel from rack
- Standard Black Colour RAL 9005
- Unique U slot for rear cable entry
- Unused ports filled with blanking plugs
- Standard 19" (ETSI style also available)
- Ports numbered for identification

Application

- Optical Networks
- CATV Networks
- Enterprise
- Data Networks
- Customer Premise Deployment
- FTTx

Design

Designed for Standard 19 Inch data cabinet optical deployments, the commodity bulkhead optical distribution panel is ideal for fast installation in optical networks with reduced cable management requirements. The sliding splice tray element allows the installer to access the splice area and maintain the rear connectors of the patch panel. The panel will accept industry standard connectors such as SC, E2000 and LC.
