

Microduct Indicator Caps

Reusable Visual Identifier Cap

Features

- New Innovation
- Developed for modern high-density duct arrays
- Available in all standard duct dimensions
- Can be reused

Application

A simple yellow high visibility indicator high-lights clearly and SAFELY the duct that is to be used.

Design

The Hexatronic visual indicator cap reduces the reliance on accurate microduct labelling. The End caps are rated to 10Bar for safety. The visual identifier cap can identify a subscriber microduct by applying 2-3 bar of pressure.

Unique locking ring on the duct makes removal of the cap simple for onward duct connection using regular duct caps.

Product Information

Indicator Cap Divisible Strain Relief Insert

Divisible Cable restraint and water block, used in 5mm Duct couplers and Duct Indicators. Suitable for Stingray Pre-terminated Drop Fiber.
