

# Cable Entry Cover

**Protect cable entry points and improve aesthetics for exterior walls**

---

## Features

- Robust for safeguarding cable entry on exterior walls.
- Effectively prevents water ingress, especially in cases of brick damage due to drilling.
- Versatile installation options with silicone adhesive or Gripfill.
- Designed to accommodate coaxial satellite and electrical cables.
- Conceals and improves the appearance of broken or chipped bricks.
- Enhances exterior aesthetics while providing essential water ingress protection.

## Application

External cabling, cable and duct installation, PIA

## Design

Introducing our Cable Entry Cover, available in brown or white, is a robust solution for safeguarding cable entry points on external walls. This innovative cover serves to ward off water infiltration, particularly when drilling has resulted in brick damage.

Secured in place with either silicone adhesive or Gripfill, this Cable Entry Cover is designed to offer a reliable and adaptable solution for various cable types.

In addition to its protective function, this Cable Entry Cover effectively conceals broken or chipped bricks, enhancing the aesthetics of your exterior while fortifying it against water ingress.
