

# Ripley Miller ACS+ Cable Slitter

Cable Slitter for Armored & Heavy-Duty Cables

---

## Features

- Lightweight material and T-handle design for improved grip and leverage.
- Special alloyed tool steel blade, hardened to cut steel armouring
- Precision blade depth adjustments in 0.1mm increments.
- Cam activating lock knob to secure the cable in the tool.
- Universal roller wheel accommodates 4mm - 28.6mm diameters.
- Longitudinal, ring and spiral cut blade positions.

## Application

The ACS+ tool is designed to work on jacketed or jacketed armoured multi-fibre cable. Its main purpose is to gain midspan or end access to loose tube fibres by slitting the outer jack or jacket armor on OSP cables.
