

Joint Box Key No.5 Balanced Leg

A lever-action pit lifter key designed for joint box and concrete cover lifting

Features

- Lever action design for efficient and easy lifting of joint box and concrete covers
- Counterbalanced leg adds safety to the lifting operation
- Also known as BT Key Joint Box 5

Design

The Joint Box Key No.5 Balanced Leg is an essential tool for lifting joint boxes and light concrete footway/driveway covers. With its lever action design and supporting counterbalanced leg, it provides a safe and efficient lifting operation. Also known as BT Key Joint Box 5, this tool is a must-have for any telecom or fiber optic installation professional.
