

The Hexatronic Multi-Fibre Preparation Tool Kit is the ultimate collection of essential tools designed for preparing fibre optic cables before installation. This comprehensive kit includes a range of fibre strippers, kevlar scissors, buffer tube tools, cutters, and ring-slit tools, all carefully selected to cater to the needs of all telecom professionals.

The kit also includes UltraGrime Multi-Use Wipes and KIM Wipes for easy cleaning of workspace and tools, as well as a sharps bin, IPA dispenser, IPA Liquid, and One Click Cleaners for efficient and safe maintenance.

With a swift ferrule assembly/ABF stripping tool for easy fibre ferrule preparation and a durable engineer's tool bag measuring 35cm x 25cm x 48cm for easy storage and transport, the Hexatronic Multi-Fibre Preparation Tool Kit is the go-to solution for all fibre optic cable preparation needs.
