

# Universal Pole Bracket UPB

Versatile aluminum alloy solution for all types of poles

---

## Features

- Made of high-strength aluminium alloy
- Unique and adaptable design
- Suitable for cable installation on wooden, concrete, or metal poles
- Two upper apertures for three drop wires each
- Two central apertures for aerial cable or drop wire
- One lower aperture for drop wires, aerial cable, or stay wires
- Can be installed in conjunction with our Stainless Steel Banding.

## Application

PIA Hardware, Physical Infrastructure Access, Pole Hardware

## Design

The UPB universal bracket, constructed from robust aluminum alloy, has been crafted to provide a versatile pole hardware solution, capable of accommodating diverse cable installation configurations on wooden, concrete, or metal poles. This bracket features two upper apertures, each designed for three dropwires, two central apertures suitable for either an aerial cable or dropwire, one lower aperture adaptable for dropwires, aerial cable, or stay wires, and two recesses thoughtfully included for attachment to wood or steel telephone poles using our Stainless Steel Banding.
