

Duct Expander

For Microducts ID 3.5 mm

Features

- Easy to use
- Hex head bit
- Expands duct inner diameter in seconds to facilitate mounting of end caps
- Works with fiber inserted in duct

Application

The tool is used to expand the microduct ends. The expansion facilitates proper mounting of microduct end caps, NDK12103. The expander has a slit to be able to expand the duct even after the installation of an air blown fiber in the duct. For better grip the duct expander can be mounted on any handle that holds hex head bits.

Design

Hex head bits, for microducts ID Ø3.5 mm

Technical Information

Product Color Light grey (RAL7038)
