

Mobra Arm With Fixings Kit 650mm

Universal solution suitable for use in all chambers

Features

- Robust design
- Suitable for all chamber styles
- 15kg load capacity
- Rust resistant
- Supplied with mounting screws

Application

Suitable for use in all chambers, including plastic stackable chambers where no drill expanding style brackets aren't an option.

Design

The Hexatronic mobra arm is a universal solution utilising a uni-strut style arm to ensure compatibility across a wide range of closures and mounting hardware.

Product Information

The arm and mounting plate are made of Zintec steel and the mounting plate has been powder coated for increased durability. All fittings supplied are stainless steel.
