Street Cabinet 535

535 mm width Street Cabinet for use with various network passive components

Features

- Stainless steel construction
- Cross flow air ventilation
- Toolless backboard installation
- Integrated cable management
- IK10 Rating
- Textured powder coat finish
- Modular two-part assembly for rapid installation
- 2-point locking mechanism
- Discreet footprint
- Anti-vandal hinges

Application

Aggregation and distribution enclosures for FTTx

Design

The Hexatronic Street Cabinets offer a versatile and durable enclosure solution for streetside optical assets.
Designed to deter opportunistic vandalism, these enclosures are available with a wide range of customer-specific, 2-point lock assemblies combined with anti-vandal hinges and lock bezzles.
Constructed entirely from 3CR12 stainless steel with a powder coated and textured finished paint.
These IK10 Rated enclosures and roots offer a durable, weather resistant solution to safely house network assets in all weathers.
Internal thermal regulation is achieved with a unique cross-flow ventilation design to minimise the impact of solar gain and condensation.
