- Lift off outer casing for easy installation
- Discreet footprint

Application

Aggregation and distribution enclosures for FTTx.

Discreet footprint ideal for rural application.

Design

The Hexatronic Street Cabinets offer a versatile and durable enclosure solution for streetside optical assets.

Designed to deter opportunistic vandalism, these enclosures are available with a wide range of customer-specific, 2-point lock assemblies combined with anti-vandal hinges and lock bezzles.

Constructed entirely from 3CR12 stainless steel with a powder coated and textured finished paint.

These IK10 Rated enclosures and roots offer a durable, weather resistant solution to safely house network assets in all weathers.

Product Information

Available, as standard, in Bronze Green or Goose Grey paint options
