

Duct Holder

Accessory to the Hexatronic ABF Installation Tool

Features

- It enables a secure grip of the duct so that the duct won't get loose even when high air pressure is used for long-distance blowing.
- The Air Blown Fibre (ABF) Duct Holder supports both our new and old models.

Application

Hexatronic UK's duct clamp makes it possible to secure Microducts in place even with the blowing tool opened. This innovation is a huge benefit for any installer wishing to deploy 'Pre-terminated ferrules' or performing a 'Mid-Blow'.

Product Information

This Clamp is supplied on all new ABF Tools from Hexatronic UK. The clamp can also be fitted to any Hexatronic ABF Tool sold previously.
