

# V2 Fiber Blowing Machine

Fiber blowing machine for cable 2.4 - 16mm and ducts from 7 - 50mm

---

## Features

- Pneumatic operation, double motors
- Electronic counter for speed and distance
- Gentle operation with 450 mm belt length
- Display for speed, distance and pressure in duct
- Max. speed: 200 m/min
- Max. pushing force on cable: 550 N
- Adjustable clamping force
- Works with JetLogger
- Duct air quick release valve
- Joystick Controller with forward and reverse function

## Application

This blowing tool is used for the installation of Nanocables and Microcables into Microducts. This tool allows for efficient installation of Hexatronic Raptor™ and Viper™ cables in the Hexatronic microduct system.

## Design

Robust and compact pneumatic operated fiber blowing machine with the unique Joystick controller securing optimal control of the installation. This machine can be configured from 2.4 to 16 mm cable and 7 to 50 mm duct. Anodized aluminum construction makes this machine both lightweight and easy to maintain.

## Product Information

The kit consists of the following standard items:

- V2 blowing machine
- Transport case
- Extra fixture
- 1 bottle Microduct Lube
- 1 bottle pneumatic oil
- Service kit

The kit can also be configured with the following accessories:

- Afterblower
- Floating kit
- 9-12 V adaptor. For replacing 9 V battery for digital display
- Jetlogger
- Duct clamps
- Cable guides
- Cable seals

## Technical Information

### Technical Notes

**Maximum Pressure:** 16 Bar

**Pushing Force:** Up to 550 N

**Cable Diameter:** 2.4 to 16.0 mm

**Duct Diameter:** 7 to 50 mm

**Weight:** Approx 10.5 kg

**Air connection:** Std 3/4" Claw connector

**Dimensions:** 360 x 230 x 410 mm

## Ordering Information

Additional duct clamp and seal sizes available. Contact Hexatronic for more information.
