

## Microduct Cutter - Pliers

For microducts 3-20 mm

## **Features**

- Creates perfect cuts on microducts
- For microducts from 3-20 mm
- Safety lock to avoid injuries

## Application

This microduct cutter is used for cutting microducts prior to the mounting of microduct snap-in connectors. The tool can cut ducts with dimensions up to 20 mm.

A perfectly perpendicular cut of the ducts is essential to avoid leaking connectors or gaps inside the connector that can cause the cable or blown fiber to get stuck.
