

Microduct Cutter

For microducts 3-12 mm

Features

- Small and compact microduct cutter
- Creates perfect cuts on microducts
- For microducts from 3-10 mm
- Safety lock to avoid injuries

Application

This tool provides a clean and straight cut necessary to perform a smooth duct splice prior to the mounting of microduct snap-in connectors. The cutter is locked in its closed position for safe handling.

The tool can cut ducts with dimensions up to 10 mm.

A perfectly perpendicular cut of the ducts is essential to avoid leaking connectors or gaps inside the connector that can cause the cable or blown fiber to get stuck.
