

Divisible Seals for Microducts

For 10-25 mm Microducts

Features

- Highly water and gas tight
- For microducts from 10 to 25 mm
- For nano cables or micro cables from 1.5 to 12 mm
- Retro-fit design

Application

The divisible seals for microducts provide a gas and watertight seal for open duct ends installed with nano cables or micro cables.

The seals are tested for best functionality in combination with the Hexatronic Raptor nano cables and Viper micro cables.

Design

The seals are designed to be installed after the fiber or cable has been blown in to the microduct.

This type of seal is intended for nano cables or micro cables and consist of a black, split main body and a rubber seal.

The seal is compressed by pushing and screwing the main body towards the duct. These seals are available for 10 to 25 mm microducts.

Product Information

Plastic housing: Glass fiber reinforced polyamide

Rubber seal: TPE

Technical Information

IP Rating IP68, 5 m

Ordering Information The articles are ordered in individual pieces, but delivered in packs with defined quantities. See pack size in the article list below.
