

Splitter Frame

For Splitter Modules, 1U or 4 U

Features

- Compact high density splitters
- Low loss solution
- 1U for up to 9 splitter units (1:64, 2:64 3pcs)
- 4U for up to 35 splitter units (1:64, 2:64 17pcs)
- 19 " or ETSI height mount

Application

The NBA 301 04 and 05 are indoor splitter frames intended for installation of splitter modules of type RDJ901200. The frames can be installed in 19" wide racks with inch or metric hole pattern. The most common use is for central office applications or connection cabinets.

Design

The frame is available in two different sizes. The 1U frames has 9 horizontal slots in 3 rows, accommodating 9 slim or 3 double sized RDJ901200 splitter units. The 4U high unit can accommodate 35 slim or 17 double sized splitter units.
 4 mounting screws / nuts are included in the package. Horizontal cable guide, storage unit or front serviced patch panel are available as accessories.

Product Information

The frames are made of painted Alu-Zinc.
 All materials are RoHS approved.
