

# Duct Branch Closure – High Capacity

Divisible Closure, for 1-12 Branches

---

## Features

- High capacity duct branch closure
- For tight protected ducts
- Up to 12 single duct branches
- Multiple configuration options

## Application

The divisible branch closure is intended for fast and easy branching of direct buried tight protected microducts.

The watertight box is sealed by a simple “cold” method requiring a minimum of tools.

It consists of two tube halves that seals towards one duct entrance rubber disc in each end. Each disc has a number of differently sized entrance holes (see table below) allowing a large number of possible joint combinations.

## Design

It consists of two tube halves that seals towards one duct entrance rubber disc in each end. Each disc has a number of differently sized entrance holes allowing a large number of possible joint combinations.

## Technical Details

**NDE 451100 Universal Configuration**

	PORT SIZE	∅ 12.2 MM	∅ 19.3 MM	∅ 22.2 MM	∅ 28.8 MM	∅ 32.1 MM	∅ 38 MM
	Qty	6	1	1	1	1	1
	Used for	1-micro duct	4-multi duct	7-multi duct	12-multi duct	19-multi duct	24-multi duct

**NDE 451 100 / 1 Modular 12 Configuration**

	PORT SIZE	∅ 12.2 MM	NA	NA	∅ 28.8 MM	NA	∅ 38 MM
	Qty	12	0	0	2	0	1
	Used for	1-micro duct	NA	NA	12-multi duct	NA	24-multi duct
