

# Identification Plate – End Mounted

For marking customer connections at end, 7-14 mm

---

## Features

- Easy to mount on Hexatronic divisible seal latch
- Compact size
- Suitable for customer address marking in distribution hub
- Fits Hexatronic divisible seals 7-14 mm

## Application

The identification plate is mounted on the locking mechanism of a Hexatronic divisible seal. A label containing essential installation information, such as customer address or customer number, can then be inserted into a transparent folder.

## Product Information

The compact design does not occupy valuable space in distribution nodes.

## Technical Information

<b>Product Color</b>	Blue/Transparent
<b>Ordering Information</b>	25 pcs/pack
