

Cable Mounts

Cable mounts for flat bars, suitable for FTTA applications.

Features

- Robust and safe
- Easy to install
- Stainless steel
- UV resistant

Application

The cable clamp mounts are used to safely attach cables on antennas or poles. Several versions are available for single to multiple cables.

Design

The clamps are made of stainless steel and UV-resistant polyamide with glass fiber.

Technical Information

Ordering Information

Several versions of clamps are available. Contact Hexatronic for details about suitable clamps for your application.
