

Blowing Bead

Brass End Caps for Air Blown Fibers

Features

- Super-slim beads for air blown fiber
- Increases blowing performance
- Minimizes risk of stops in spliced ducts
- Easy to mount with pliers

Application

Beads that can be mounted on the tip of the air blown fiber unit for optimal blowing performance. This is recommended for long installation distances with many duct connectors or sharp bends.

Design

The end caps are made of brass with a conical tip. They are inserted onto a blown fiber and attached by pressing with a pair of pliers. The beads come in two different sizes to suit the different blown fiber units.

Product Information

Material: Brass

Technical Information

Installation Notes

Warning!

Always ensure that the right size of cable end cap is used.

The end cap must be attached to the fiber firmly.

Ordering Information

Blowing beads are sold in bags with 100 pcs.
